

ODP 791-77  
29 April 1977

MEMORANDUM FOR: Deputy Director for Administration  
FROM : [REDACTED]  
          Acting Director of Data Processing  
SUBJECT : ODP Report for Week Ending 29 April 1977

STATINTL

Identification of Major ADP Projects

Work is being done to identify the major ADP projects that will be supported by central services for FY-79. This is in accordance with an EAG recommendation that the Comptroller provide more ADP planning information. Projects whose resource billing will amount to \$250,000 or more will be identified.

Secure Storage for Director's Data

ODP has been requested by Director Turner to provide a secure storage facility for several Rapid-Search tapes. Storage will be provided in a safe in one of the ODP tape libraries.

Lease to Purchase of CDC Peripherals

ODP is proceeding with the conversion of 126 CDC disk drives and associated controllers from lease to purchase. This conversion, which had been delayed by an Itel Corp. protest, will produce a cost avoidance of at least \$900,000 over the system life of the equipment.

Itel Corp. Withdraws Request

Itel Corp. has cancelled and withdrawn its letter of 17 January 1977. The letter had requested information under the Freedom of Information Act pertaining to the procurement of direct access devices (disk drives).

Status of [REDACTED] Mass Storage Settlement

The ODP Budget and Finance Officer has begun the task of identifying and liquidating prior year obligations as a result of the out-of-court settlement made with [REDACTED] on the Mass Storage System.

GSA Federal Software Exchange Program (FSEP)

Mrs. Helen McEwan, Program Director, FSEP, will meet with C/MS/ODP on 6 May 1977 to discuss the Software Exchange Program.

Support to Director of Central Intelligence

DCITASK - Automation of two tasks for the DCI. Another demonstration of TASK I (reporting of contacts) was conducted, showing terminal menu formats and inputting procedures. We are now in the documentation stages and a member of the DCI staff completed GIM II User Language training this week.

TASK II (scheduling of appointments) is also progressing well.

The DCI has expressed an interest in having a terminal installed at the FOB. We have informed his staff of the approximate costs and will await an official request before taking any action.

Support to Office of Finance

GAS - General Accounting System. We now have the capability to produce Computer Output Microfilm (COM) efficiently on some month-end reports. Resequencing the reports and computer run changes were necessary to minimize the number of tapes involved. The OF wants to go back to October 1976 and produce COM for all month-end General Ledger Reports up to the current month.

CAMS

A Technical Exchange Meeting with DIA representatives is scheduled for Friday, 29 April, in preparation for the CAMS-AIRES interface testing scheduled to begin 3 May 1977.

SAFE

Members of the RFP Review Panel for the SAFE Design Competition Phase RFP met this week to review comments and suggestions. Several minor changes were suggested and are being incorporated. The RFP should be ready to go out next week.

Some minor, non-substantive changes are also being made to the SAFE Functional Requirements Document so it can be included in the RFP package.

We drafted and coordinated with ODI a response to five Congressional questions regarding the FY-78 budget and the ADISS/SAFE coordination.

RAPID

The President of [REDACTED] visited the Agency this week to discuss the project status. The next two milestones will be two months later than scheduled. A response to the contractor is being coordinated with PD/OL, asking for a schedule recovery plan. STATINTL

Training

A two day course, Data Processing Concepts, was completed by 18 students.

A two day course, GIM II User Language, was completed by 22 students. STATINTL
